

FIBER OPTIC SOLUTIONS

Netprom offer 2015/2016

WWW.NETPROM.COM.PL

THE FUTURE IS FAST

Netprom

About us

Netprom offer high performance products with superior reliability. Working with our high performance cables.

Netprom cooperation with Optronics and FibreFab. Netprom is a leading professional Fiber Optic and Data connectivity solution supplier and exporter from UE. We focus on producing Fiber Optic Equipment, passive components and assemblies to the customer worldwide.

Workstation and testing devices that satisfy our customers' requirement.

Netprom offers unmatched reliability for your mission critical systems, from the central office to the home. Many fiber optic companies offer pieces of this solution. Netprom offers it all.

In the short time since Netprom was founded we have grown into a full service manufacturer of fiberoptic components, assemblies, PLC splitters, high fiber count cable terminations, Lgx style patch panels, pre-loaded adapter plates and much more.

We will assist you in any way we can, whether the needs are fiberoptic connectors, adapters, jumpers, pigtailed, patch panels, pre-loaded LGX adapter plates, or consulting. Should you have any questions about Netprom or our products, please contact us.

We are a Polish producer of wide range of modern products for the market of telecommunications, industry, automatization and urban networks. We are one of the european leaders in distribution and production of the components used to build fiber optic networks and structural cabling systems.

Our solutions are being used for the construction of the modern IT systems with an emphasis on the fiber optic technologies for operators networks, metropolitan networks and last mile FTTH networks.

Our company often marked out new directions in the industry especially by introducing new products connected with microcanalization and FTTx systems.

The Company's headquarters are located in Czulchów (Poland) alltogether with the Research & Development Center and Logistic Center.

The Company's important part is export department, which gives us an opportunity to attend international projects as a supplier of competitive solutions or subcontractor of selected products. Thanks to that we gain experience and knowledge about the newest trends which appear all over the world. Currently our products are virtually being sold and used in European Union.

Optical Fibre Assemblies

Singlemode Pigtails

Connector Options

Singlemode pigtails are used in telecom, datacom networks and also used for high speed metropolitan and access network. The singlemode pigtail buffer conforms to IEC, EIA TIA or

Telcordia standards. The singlemode pigtails are terminated with premium low loss connectors which gives optimum optical performance.

Features & Specifications

- >> Available in SC, ST, FC, LC, E2000 connector styles
- >> Netprom product manufactured on 900 micron buffer fibre (nominal dia.)
- >> Individual test sheet and unique product identification number for traceability

- >> Low insertion loss ($\leq 0.15\text{dB}$) & high return loss ($\geq 55\text{dB}$)
- >> Buffer available in up to 12 colours
- >> Materials compliant to 2011/65/EU

Technical Specifications

TEST	METHOD	SPECIFICATION
Connector Type Standards	IEC 61574 series	-
Insertion Loss	IEC 61300-3-4	$\leq 0.15\text{dB}$
Singlemode Return Loss UPC	IEC 61300-3-6	$\geq 55\text{dB}$

ASSEMBLY SPECIFICATION	
Length of assembly	Tolerance
Less than 0.5m	-0/+0.10m
Between 0.5m and 5m	-0/+0.15m
Greater than 5m	-0/+0.20m

ordering information see page 9

Pigtails and Patchcords

Multimode Pigtails

Connector Options

Multimode pigtails are used to connect high speed networks like gigabit ethernet, fast ethernet and ethernet. The multimode pigtail buffer conforms to IEC, EIA TIA or Telcordia

standards. The multimode pigtails are terminated with premium low loss connector which gives optimum optical performance.

Features & Specifications

- >> Available in SC, ST, FC, LC, E2000 connector styles
- >> Netprom product manufactured on 900 micron buffer (nominal dia.)
- >> Low insertion loss ($\leq 0.15\text{dB}$)

- >> Individual test sheet and unique product identification -number for traceability
- >> -Buffer available in up to 12 colours
- >> -Materials compliant to 2011/65/EU

Optical Fibre Assemblies

Blister Pack Pigtails

We can now offer you a more convenient and cost effective way to purchase pigtails. You get our usual high quality pigtails but now with a reduction in the amount of packaging and paperwork, saving costly engineers' time unpacking onsite.

Features

- >> Blister packed pigtails include FC, LC, SC & ST variations
- >> Easy strip
- >> IEC and DIN colour codes available (IEC as Standard)

Benefits

- >> Convenient space saving shipping & storage
- >> Blister pack offers superior transport protection
- >> Environmentally friendly, generating less waste from packaging and certification

Technical Specifications

	Max
Insertion Loss	0.25dB
Return Loss (SM UPC)	≤55dB
Return Loss (SM APC)	≥65dB
Operating Temperature	-20°C to + 60°C
Intermateability	Compatible with all equivalent connectors as per IEC 61754

ordering information see page 9

Pigtails and Patchcords

Part Number Generator

Example Part Number **SC 62 B 1.5 TB /Z**

Will configure an LC OM3 pigtail 10 metres long..

Note: MOQ may apply, please call us for details.
 Other colour options available on request.
 1 Other lengths available upon request..

Pigtails and Patchcords

Part Number Generator

Example Part Number **FC FC 62 D OR 3 /Z**

Will configure an OM1 FC to FC duplex patch cord in orange 3 metres long.

¹Other connectors available upon request.

²mTRJ is available in MiniZip only.

³Other colour options available for singlemode cable.

⁴Other lengths available upon request.

Optical Fibre Assemblies

Reduced Bend Sensitivity Patch Cords

Features

Netprom patch cords and pigtails are available in both singlemode and multimode classes based on reduced bend sensitivity (RBS) fibre cable.

RBS patch cords exhibit much lower optical power loss under bend conditions while remaining compatible with conventional cabling. RBS patch cords are made with solid trench assisted optical fibre that is designed to reduce optical loss when the cable is bent. RBS patch cords provide the same high quality, mechanical features and optical performance as our standard patch cords with the added capability of maintaining optical performance when bent or flexed.

RBS patch cords are available for multimode (OM3 and OM4) and singlemode (OS2/ G.657A1 and G.657A2) networks.

Applications

RBS patch cords are which low loss in tight radius routing is important:

- >> When routing cable around corners and in tight spaces is required, for example in FTTH installations in existing buildings
- >> FTTH cabling in POPs, MDU distribution points and subscriber connections
- >> Data Centres where network uptime is critical. For example, OM4 RBS patch cords will continue to provide data service when pinched by a cabinet door, whereas service would be lost with conventional OM4 patch cords
- >> Generally, when small radius installation is needed or the cabling may be subjected to occasional small radius events

Straight fibre as reference

G.652.D > 15.10dB

RBS > 0.21dB

Example Part Number **FC FC RM3 D 1.6 YE 10 /Z**

Will configure an FC to FC 1.6mm Duplex OM3 reduced bend cable in yellow at 10 metres.

¹ 1.6mm only available as singlemode.

² Other lengths available upon request.

Optical Fibre Assemblies

Premium Patch Cords

Netprom Premium range patch cords are suitable for low loss telecom, datacom, data centre and some critical applications. The patch cords provide flexible interconnection to active equipment, passive optical devices and cross-connects. The patch cords are terminated with

Premium range physical contact (singlemode & multimode) and angled physical contact (singlemode) zirconia ferrule connectors which are manufactured with precision factory mounting and polishing techniques which helps assure high transmission quality.

Features

- >> Conform to IEC, EIA-TIA, or Telcordia performance requirements
- >> Available in different fibre types
- >> Available with different connector types
- >> Available in standard and custom lengths
- >> REACH / SvHC compliant
- >> Materials compliant to 2011/65/EU

Applications

- >> Data centre
- >> Telecommunication networks
- >> High bandwidth 40G & 100G networks
- >> CATV
- >> LAN and WAN
- >> FTTX

Optical Fibre Assemblies

High Performance Patch Cords (Typical 0.08dB IL)

Netprom High Performance singlemode Patch cords are a range of "best in class" patch cords employing highest grade components, manufacturing processes and test methods that offer excellent

performance for demanding telecommunications and data centre applications. High Performance Patch cords are used where low loss budgets are essential and may be considered for splice replacement.

Features

- >> Conform to IEC, EIA-TIA, or Telcordia performance requirements
- >> Grade A singlemode connector class applied
- >> Special high accuracy G.652D photonics fibre
- >> End face geometry result data included
- >> REACH / SvHC compliant
- >> Materials compliant to 2011/65/EU

Applications

Optical Fibre Assemblies

Armoured Patch Cords

Netprom armoured patch cords are used in customer premises, central offices and in harsh environments. The patch cords provide flexible interconnection to active equipment, passive optical devices and cross-connects. Armoured patch cords are constructed with an

helical stainless steel tape over a buffered fibre surrounded by a layer of aramid and stainless steel mesh with an outer jacket. Netprom patch cords are terminated with our standard range of connectors, all quality tested to meet Netprom and international standards.

Features

- >> SC, LC, ST and FC connectors
- >> Available in low smoke zero halogen (LSZH) jacket

Optical Fibre Assemblies

Mode Conditioning Patch Cords

Multimode optical fibre links, that use laser based transmitters, may be limited in bandwidth to values less than half those of the over-filled launch bandwidth. Mode conditioning patch cords are designed to allow the use of laser transmitters in 62.5/125 (OM1) or 50/125 (OM2) multimode fibre optic cabling systems.

These assemblies allow long wavelength 1300nm signals to be transmitted, over good quality fibre, at distances of up to 550m. The Netprom mode conditioning cable assembly, improves performance by moving the singlemode launch to an offset position, increasing the mode fill and reducing DMD.

Connectors available

- >> Types: FC, FC/APC, ST, SC, SC/APC, LC, MTRJ, MU
- >> Length: 2m ± 10mm (Other lengths available to order)
- >> Each patch cord is individually packaged and identified for traceability
- >> A test certificate is supplied for each assembly

Technical Specifications

DESCRIPTION	MULTIMODE	
	62.5/125	50/125
Operating Wavelength	1300nm	
Maximum Insertion Loss:	0.5dB	
Coupled Power Ratio (CPR):	28 to 40dB	12 to 20dB
Back Reflection:	S/M Channel:	-30dB
	M/M Channel:	-20dB
Connector Finish	PC or APC	
Sheath Colour	Orange (yellow for SM leg)	

Mode Conditioning Principle

Pigtails and Patchcords

Attenuated Patch Cords

Netprom attenuated patch cords are used to attenuate the optical signal in a link. Attenuated patch cords can be installed in place of conventional patch cords to provide a constant level of attenuation with a return loss of ≥ 50 dB. The attenuated patch cord can be used to replace the

conventional cable assembly and attenuator combination. It is a compact, multi-purpose, passive device designed to operate at wavelengths of 1310 and 1550nm. Attenuated patch cords can be provided with LC, SC, ST and FC connector styles as per customer requirements.

Features

- >> Provides the functions of attenuator and cable assembly simultaneously
- >> Low back reflection
- >> 100% insertion loss testing
- >> Connector varieties available
- >> Conforms to the requirements of EIA/TIA standards
- >> Inexpensive and compact

Application

- >> Telecommunication networks
- >> CATV
- >> LAN and WAN
- >> Attenuation values available
- >> 01= 1dB, 02= 2dB, 03= 3dB, 04= 4dB, 05= 5dB
- >> 06= 6dB, 07= 7dB, 08= 8dB, 09= 9dB, 10= 10dB
- >> 15= 15dB, 20= 20dB

Optical Fibre Assemblies

Telecom Patch Cords

Telecom patch cords are designed for low loss telecom applications. Our patch cords provide flexible interconnection to active

equipment, passive optical devices and cross-connects. They are terminated with premium grade zirconia ferrule connectors which help assure high transmission quality and low optical power loss.

Features

- >> Enhanced optical performance to meet tight Telecom power budgets
- >> New flexible boot allows connection in compact spaces
- >> Standard LC and SC connector types
- >> Standard and bend insensitive Singlemode Fibre types, G652D, G657 A1, G657 A2
- >> Cable available with IEC 60332-3-24 fire performance
- >> Available in standard and custom lengths
- >> IEC, EIA/TIA and Telecordia compliant
- >> RoHS, REACH and SvHC compliant

Applications

- >> Telecom
- >> High Bandwidth Ethernet and Fibre Channel
- >> Storage Area Networks (SANs)

Optical Fibre Assemblies

SC Connectors

Netprom manufactures a range of SC connectors suitable for various applications. SC connectors are used in most of the newer network applications and with less parts and a plastic body it offers an economical option.

The SC connectors are available in singlemode for both PC and APC and in multimode PC. The connectors come with standard Netprom boots suitable for 900 μm , 2mm and 3mm cable diameters. The Netprom SC connector is available in standard colours including blue, green and beige.

Features

- >> Complies with IEC 61754-4, IEC 60784-14 and TIA 604-3
- >> A push-pull coupling mechanism for easy insertion and consistent connection
- >> Zirconia ceramic ferrule available in several performance grades
- >> Low insertion loss and back reflection capability
- >> RoHS, REACH SvHC compliant

Applications

- >> Data centres, premise installations, telecommunication networks
- >> Ethernet, fibre channel, ATM, LAN, MAN and WAN

Connectors and Adaptors

SC Adaptors

Netprom offers a range of high quality SC adaptors which have high precision alignment sleeves for reliability and improved reconnectability. For singlemode applications a ceramic sleeve is supplied to ensure a high precision alignment. For multimode

applications a phosphor bronze sleeve is supplied. The housing is available in different colours with options for flange or flangeless body, metal clips or inbuilt clips.

Features

- >> Complies with IEC 61754-4 and IEC 60784-14 standards
- >> High precision alignment sleeve
- >> Low insertion loss and improved reconnectability
- >> RoHS, REACH, SvHC compliant
- >> Available in simplex and duplex adaptors
- >> SC simplex adaptors are available with a shutter (see page 10 for details)

Applications

- >> Data centres, premise installations, telecommunication networks
- >> Ethernet, fibre channel, ATM, LAN, MAN and WAN

SC Shuttered Adaptors

Netprom SC shuttered adaptor integrates safety features suitable for FTTH and other telecom applications. It has a high precision zirconia alignment sleeve designed for high reliability and excellent reconnectability in all singlemode networks. It has a spring loaded

plastic shutter for laser safety and dust protection. The shutter displays a warning label to indicate laser risk. The adaptors are available in standard colours and packaging.

Features

- >> Complies with IEC 61754-4, IEC 60784-14 and TIA 604-3
- >> High precision alignment sleeve
- >> High quality and durable shuttered adaptor
- >> Low insertion loss and high reconnectability
- >> RoHS, REACH SvHC
- >> Available in standard colours and standard packaging

Applications

- >> Specially designed for Fibre-To-The-Home (FTTH) applications
- >> Telecommunication networks
- >> CATV, LAN and WAN
- >> Broadband
- >> Indoor and outdoor applications

Simplex Patchcords

Duplex Patchcords

The Netprom LC Connector is a cost effective, small form factor fibre optic connector that helps to reduce space on panels or outlets by up to 50%. It uses the standard RJ-style telephone connector which gives an audible click upon engaging.

The LC connector uses a 1.25mm ferrule and is available in singlemode for both UPC and APC and in multimode PC. The connectors come with standard boots suitable for 900µm, 2mm and 3mm cable diameters. The connector is available in simplex and duplex (with clips) options available in blue, green and beige.

Features

- >> Complies with IEC 61754-20 and TIA 604-10-A for intermateability
- >> Compact design based on RJ45 style interface
- >> Low insertion loss and back reflection capability
- >> Zirconia ceramic ferrule with high end PC finish
- >> RoHS, REACH SvHC compliant
- >> Available in standard colours and standard packaging

Applications

- >> Telecommunications networks
- >> CATV, LAN, MAN and WAN application
- >> Data processing networks
- >> Cable television
- >> Fibre-To-The-Home (FTTH)
- >> Premises distribution

FC Connectors

The Netprom FC features a 2.5 mm ferrule and a threaded coupling nut, for a secure connection in high vibration environments and in lab testing for consistent results.

Netprom manufactures a range of FC connectors suitable for various applications.

The FC connectors are available in singlemode in both PC and APC and multimode PC. The connectors come with boots suitable for 900µm, 2mm or 3mm cable diameters. The FC connectors are available in blue, green and beige.

Features

- >> Complies with IEC 61754-13 and TIA 604-4-A for intermatability
- >> Low insertion loss and back reflection
- >> Precision anti rotation key for mechanical stability
- >> Nickel plated metal body corrosion resistant
- >> Zirconia ceramic ferrule with high end PC finish or APC finish
- >> RoHS, REACH SvHC compliant
- >> Individual parts packed in bulk package

Applications

- >> Telecommunications networks

Optical Fibre Assemblies

FC Adaptors

Netprom offers a range of high quality FC adaptors featuring precision alignment sleeves for high reliability and better reconnectability.

FC adaptors come with ceramic sleeves for singlemode and phosphor bronze sleeve for multimode. The housing has a metal body and a M8 nut.

Features

- >> Complies with IEC 61754-13 and TIA 604-4-A
- >> High precision alignment sleeve for low insertion loss
- >> Low insertion loss and high reconnectability
- >> Narrow key, 2.06mm for APC and PC connectors
- >> RoHS, REACH SvHC compliant
- >> Available in simplex only with DD footprint

Applications

- >> Telecommunications networks
- >> Local area networks
- >> Data processing networks
- >> Cable television
- >> Premises distribution
- >> Test and laboratory equipment
- >> Industrial and military application

Connectors and Adaptors

MU Connectors

Netprom MU connectors are the new generation small form factor connectors developed by NTT, Japan. MU connectors are similar to the SC connectors in construction and mechanical function, but have a ferrule diameter of 1.25mm.

Netprom offers a range of MU connectors suitable for various applications. Our connectors are subjected to intense mechanical testing and can withstand harsh environments and therefore we are proud to say that our products are of high quality.

Features

- >> Complies with IEC 61754-6
- >> Fewer parts for easy assembly and corrosion resistant thermoplastic body
- >> A push-pull coupling mechanism for easy insertion and high repeatability
- >> Two connections in one SC shape adaptor
- >> Zirconia ceramic ferrule with high end PC finish
- >> Low insertion loss and back reflection
- >> RoHS, REACH SvHC
- >> Available in standard colours and standard packaging

Applications

- >> Data centres, premise installations, telecommunication networks
- >> Ethernet, Fibre channel, ATM, LAN, MAN and WAN
- >> Suited for high density application
- >> Distribution cable assemblies
- >> Board mounted application
- >> Data processing networks

E2000 Adaptors

Netprom offers a range of high quality E2000 adaptors which have high precision alignment sleeves for reliability and better reconnectability. Each E2000 connector has an inbuilt mechanism to open the shutter and guide the ferrule in the alignment sleeve.

E2000 adaptors come with a ceramic sleeves for the singlemode and phosphor bronze sleeves for the multimode. The housing is available in different colours and a flangeless body option.

Features

- >> Complies with IEC 61754-15
- >> High precision alignment sleeve
- >> Low insertion loss and high reconnectability
- >> RoHS, REACH SvHC compliant
- >> Available in simplex only

Applications

- >> Suitable for high power laser applications
- >> Telecommunications networks
- >> WDM, DWDM applications
- >> Testing and measurement equipment

Connectors and Adaptors

MT-RJ Adaptors

An optical fibre adapter or uniter is used to mate two connectors together, usually mounted in a distribution panel or wall box. In most cases it is the critical part of the system that aligns the ferrule part of the connectors keeping the fibres in perfect alignment.

In the case of the MT-RJ and MPO the alignment is carried out by two small pins fitted to one of the connectors and the adapter is purely to support and lock the connectors. When joining MT-RJ connectors, one connector must always be male with pins and one must be female without pins.

Features

- >> Transmission Method (ATM)
- >> Premise installations
- >> Industrial and military applications

Applications

- >> Plug-jack (RJ-45) design
- >> TIA/EIA568-A Compliant
- >> Precision moulded for proper alignment
- >> Available in black and beige coloured body

Hybrid Adaptors

Male to Female

Netprom Hybrid adaptors are used for mating different connectors on either side. They can be practically used in any application and connect different connector types. FibreFab hybrid adaptors conform to international standards and are quality tested. Hybrid adaptors are available in singlemode and multimode and many different configurations.

Connectors and Adaptors

900µm Buffered Pigtail Fibre

900µm OM1 62.5/125, OM2 50/125, OM3 50/125 multimode or OS1/OS2 (ITU-T G.652D) singlemode 900µm buffered pigtail range.

- >> Choice of fibre types
- >> Choice of buffering material and stripping options
- >> Robust 900µm secondary coated fibres for ease of termination
- >> Standard white buffer colour
- >> Also available in 12 standard colours on request

Applications

- >> Pigtails
- >> Internal interconnect
- >> deal for a wide range of telecoms, datacoms and process control applications where ruggedisation is required
- >> Data centres
- >> Suitable for repeated handling in patch panels and racks
- >> Suitable for all standard connector types.

Fibre Optic Solutions

Secondary Coated 900µm Fibre

G.652 D OS1/OS2 Singlemode Optical Fibre

Netprom specification for ITU-T G.652 D 9/125 singlemode optical fibre exceeds the OS2 singlemode requirement(s). Low Water Peak (LWP) singlemode optical fibre with doped silica core and silica cladding; dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following LWP singlemode requirements.

Detailed technical specifications are available on request:

- ITU-T G.652 D
- IEC 60793-2-50 type B1.3
- ISO/IEC 11802 OS1/OS2
- TIA/EIA 492-CAAB
- Telcordia GR-20-CORE

Applications

- >> Operational in the entire 1260nm to 1625nm wavelength range
- >> Low chromatic dispersion in the 1310nm operating window
- >> Low attenuation at the 1383 nm water peak region
- >> Operational in the 1360nm to 1460 nm
- >> All OS2 Netprom cable constructions including tight buffered, loose tube and ribbon
- >> Supports 1 Gb/s up to an indicative 5 km in data networks
- >> Supports high speed multi channel video, data and voice services in metropolitan and access networks
- >> ATM, SONET and WDM, CWDM

62.5/125 OM1 Multimode Optical Fibre

Netprom specifications for standard OM1 62.5/125 graded-index multimode optical fibre with doped silica core and silica cladding. Dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following 62.5/125 requirements.

Detailed technical specifications are available on request:

- ITU-T G.651
- IEC 60793-2-10 type A1b
- ISO/IEC 11802 OM-1
- TIA/EIA-492AAAA
- Telcordia GR-20-CORE

Applications

- >> Gigabit Ethernet in high speed LAN networks, over an indicative 275m link length at 850 nm wavelength
- >> Legacy networks including Ethernet, Fast Ethernet and FDDI
- >> All OM1 Netprom cable constructions, including tight buffered, loose tube and ribbon
- >> Data centres
- >> Premises cabling in data networks including backbone, riser and horizontal
- >> Supports video, data and voice services

50/125 OM2, OM3 & OM4 Multimode Optical Fibre

Netprom specification for standard OM2, OM3 and OM4, 50/125 graded-index multimode optical fibre with doped silica core and silica cladding. Dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following generic and laser-optimised 50/125 requirements.

Detailed technical specifications are available on request:

- ITU-T G.651
- OM2 to IEC 60793-2-10 type A1a.1, OM3 to IEC 60793-2-10 type A1a.2, OM4 to IEC 60793-2-10 type A1a.3.
- ISO/IEC 11801
- OM2 to TIA/EIA-492AAAB, OM3 to TIA / EIA-492AAAC, OM4 to TIA / EIA-492AAAD
- Telcordia GR-20-CORE

Applications

- >> OM2 for use in 1 Gb/s high speed LAN networks over a 550m indicative link length at 850nm wavelength using a laser launch
- >> OM3 for use in 10 Gb/s high speed LAN networks over a 300m indicative link length at 850nm wavelength using a laser launch
- >> OM3 for use in 1 Gb/s high speed LAN networks over a 1000m indicative link length at 850 nm wavelength using a laser launch
- >> OM4 for use in 10 Gb/s high speed LAN networks over a 550m indicative link length at 850nm wavelength using a laser launch
- >> OM4 for use in 1 Gb/s high speed LAN networks over a 1000m indicative link length at 850 nm wavelength using a laser launch
- >> High speed and legacy networks including Gigabit Ethernet, Fast Ethernet and Ethernet
- >> All OM2, OM3 & OM4 Netprom cable constructions including tight buffered, loose tube and ribbon
- >> Data centres
- >> Premises cabling in data networks including backbone, riser and horizontal
- >> Supports video, data and voice services

Fibre Optic Cable

Cable for Patchcords

The cables are jacketed in a Low Smoke Zero Halogen material to reduce the emission of toxic fumes in the event of fire and to comply with international fire regulations.

Netprom fibre optic patch cables are ideal for patchcords and pigtails which are utilised in equipment rooms, data cabinets and at user outlets.

Fibre Optic Solutions

Simplex Fibre Optic Patch Cable

Netprom simplex fibre optic patch cable is ideal for use in office LAN connections, patchcords, pigtails and internal point-to-point links where frequent handling is likely (e.g. data cabinets,

equipment rooms, user outlets). Utilising 600µm or 900µm buffered fibre, the cable is suitable for use with industry standard connectors and can be easily made into a patchcord.

Fibre Optic Solutions

Flat Duplex Fibre Optic Patch Cable

Netprom flat duplex fibre optic patch cable is constructed with two simplex units held together with an overall LSZH jacket. Ideal for use in office LAN connections, patchcords, pigtails and internal point-to-point links where frequent handling is likely (e.g. data

cabinets, equipment rooms, user outlets). Utilising 900µm buffered fibre, the cable unit is suitable for use with industry standard connectors and can be easily made into a patchcord.

Fibre Optic Cable

Tight Buffered Cables

Netprom tight buffered and breakout cables are manufactured using 900µm buffered fibres in a variety of constructions. Aramid or e-glass yarns are utilised to provide strength and to protect the fibres. The cables can be supplied with either Low Smoke Zero Halogen or PVC jackets, depending on the application.

Netprom tight buffered and breakout cables have a variety of applications. These include horizontal distribution, backbone and riser applications, patchcords, rack to rack links in equipment rooms and short run external inter-building links.

Fibre Optic Solutions

Tight Buffered Distribution Cable (4-24 Fibres)

Netprom tight buffered internal distribution cables are constructed of 900µm buffered fibres surrounded by e-glass strength members jacketed in an LSZH outer jacket.

Fibre Optic Cable

Tight Buffered Distribution Cable

Multi-core (36-96 Fibres)

36 to 96 fibre, stranded sub unit rodent resistant internal distribution cables consisting of 4 to 8, 12 fibre sub units and fillers when necessary. Each sub unit consists of 12, 900 µm tight buffered optical fibres with e-glass non-metallic strength members and LSZH

jacket. The individually coloured 6mm outside diameter (OD) sub units are helically stranded around an FRP central strength member with polyester wrapping tape, ripcord and Low Smoke Zero Halogen (LSZH) final jacket.

Applications

>> Internal cable for horizontal distribution or riser applications

Features

- >> Choice of fibre type
- >> Colour coded fibres for easy identification
- >> High strength aramid yarn strength members for ease of handling
- >> Easy to use

Fibre Optic Cable

Loose Tube Cables

Netprom loose tube cables are designed around 250µm fibres in either a single gel filled, or dry PBT loose tube, or several tubes stranded around a central strength member. The gel, where present, is to protect the fibres from water ingress. The central strength member can be either steel or FRP (Fibre Reinforced Plastic). The cables are available up to 144 fibres.

These cables can be supplied with armouring to protect against water ingress, rodents, insects and physical damage. They can be supplied with either PE (polyethylene) jackets for exterior applications or Low Smoke Zero Halogen jackets for internal/external use. Dry Loose Tube cables utilise super absorbent polymer waterblocking technology.

Netprom loose tube cables can be used internally for horizontal distribution or externally for short or long distance applications. They can be optimised for laying in ducts, direct underground burial, aerial applications or even underwater deployment.

Fibre Optic Solutions

Single Loose Tube Fibre Optic Cable (4-24 Fibres)

2 to 24 fibre OM1, OM2, OM3, OM4 multimode or OS1/OS2 (ITU-T G.652D singlemode 250µm single loose tube external duct cables with e-glass strength members and polyethylene (PE) or Low Smoke Zero Halogen (LSZH) jacket.

The single loose tube cables consist of 2 to 24, 250µm optical fibres in a single gel filled loose tube with e-glass non metallic strength members and black PE or LSZH jacket with ripcord.

Installation Temp.	°C	-20~+60	-20~+70
Crush Resistance	N/100mm	2000	2000

Applications

- >> Ideal for internal/external duct applications
- >> Suitable for one or both end pre termination

Features

- >> Colour coded fibres
- >> Compact 250 µm dry loose tube construction
- >> E-glass yarn for rodent resistance
- >> LSZH jacket for optimised fire performance

Fibre Optic Cable

Dry Multi Loose Tube (24-144 Fibres)

The up to 12 element internal/external multi loose tube cable construction consists of up to 144, 250 µm optical fibres in 12 fibre waterblocked dry loose tubes with fillers where appropriate. The tubes are SZ stranded around an LSZH jacketed fibre reinforced

plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helically applied waterblocking E-glass or aramid non-metallic strength members with ripcord and LSZH jacket.

Applications

>> For use in external compact ducts by air blowing

Features

- >> Compact construction offering minimised cable diameter
- >> Designed specifically for external air blown duct applications
- >> All dielectric construction with nylon jacket option for reduced installation friction
- >> FRP central strength member providing high tensile strength and kink resistance
- >> SZ reverse oscillated stranding for easy installation
- >> Black polyethylene or PA outer jacket for resistance to the environment
- >> Waterswellable dry core construction for ease of installation

Fibre Optic Cable

Multi Loose Tube Double Jacket Fibre Cable

(24-144 Fibres)

NEW

The multi loose tube cable construction consists of up to 12 elements and a maximum of 144, 250µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a fibre reinforced plastic (FRP) central strength member with waterswellable

threads and waterswellable tape. Helically applied waterblocking e-glass non-metallic strength members with ripcord and PE inner jacket, corrugated steel tape (CST) armouring and black high density polyethylene (HDPE) final jacket with ripcord.

Applications

>> Suitable for external applications in ducts or for direct burial

Features

>> Choice of fibre type
>> Colour coded fibres
>> High water resistance
>> Two PE jackets

Fibre Optic Cable

Aerial Cable, Direct Burial And Duct Fibre Optic Cable

Netprom offers a range of aerial fibre optic cables including figure of 8 and ADSS (All Dielectric Self Supporting) cables. These products can be a very cost effective way to establish an infrastructure network as they avoid the need for expensive ducting to dig trenches.

Netprom figure of 8 aerial cables can be used as a very cost effective aerial solution for spans usually up to 70 metres.

Netprom ADSS cables can be attached to power lines, hung between poles or between buildings in campus environments. These cables have no metal parts and their strength is provided by the use of aramid yarns and FRP (fibre reinforced plastic) central strength members. Netprom can offer ADSS cables with a span of up to 1200 metres.

The parameters covering aerial cables and their accessories are quite complex, involving issues such as length of span, temperature range, wind speed tolerance and other factors. Every project is likely to have differing demands. Further details can be provided on application. For this reason, the following pages are intended as a guide.

Fibre Optic Solutions

ADSS MLT Fibre Optic Cable (2-144 Fibres)

Netprom All Dielectric Self-Supporting Multi Loose Tube (MLT) cables are constructed of fibres inside gel filled central loose tubes wrapped around an FRP central strength member. This is encased in a PE inner jacket, aramid yarns and a PE outer jacket.

Features

- >> Lightweight, all-dielectric construction is ideal for use near electrical power lines and in areas of frequent lightning strikes
- >> Round construction is ideal for minimum wind drag and ice build-up
- >> High tensile strength
- >> Wide operating temperature range: -40°C - +70°C

Applications

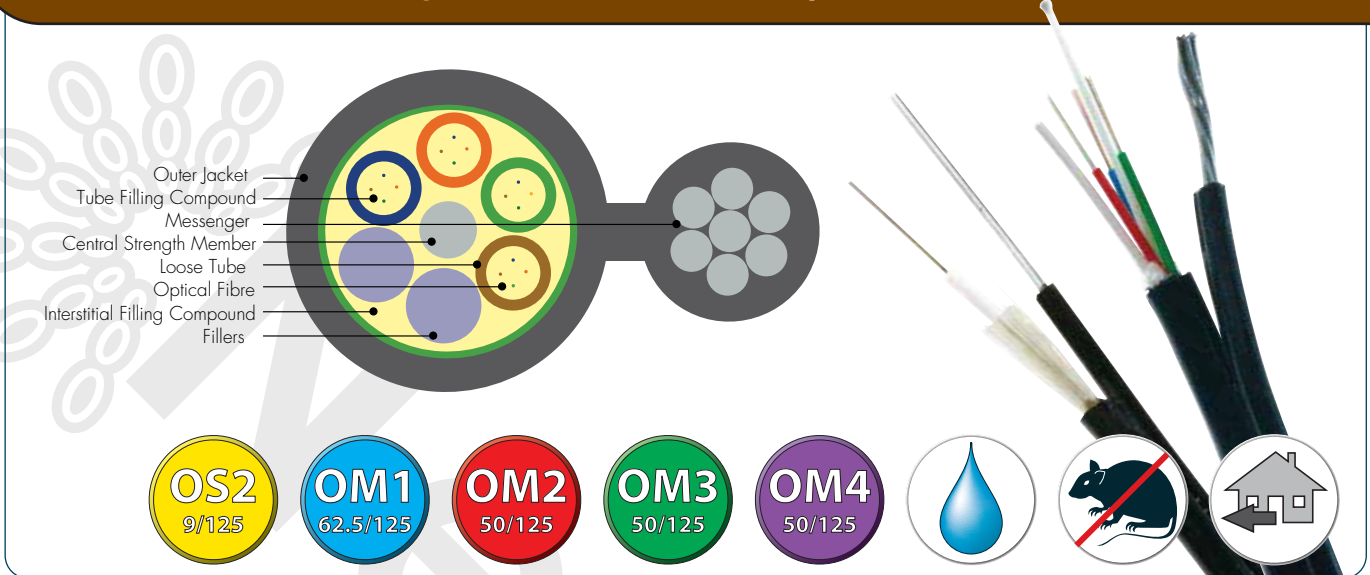

>> Suitable for installation on poles and on the power distribution network

Fibre Optic Cable

Aerial Cable Figure 8 Fibre Optic Cable (2-60 Fibers)

Features

- >> Up to 144 fibres with single or multimode options available
- >> The loose tube stranding technology make the fibres have good secondary excess length and allow the fibres free movement in the tube, which keeps the fibre stress free while the cable is subjected to longitudinal stress
- >> Aluminium moisture barrier tape and corrugated steel tape options
- >> Stranded wires as self supporting member providing excellent strain performance and convenient installation

Netprom figure of 8 aerial cable, for spans up to 70m, consists of 250µm optical fibres in gel filled loose tubes with interstitial gel. Water barrier aluminium tape or steel tape armouring options are available. Tensile strength is provided by a steel messenger wire. The cable jacket is black high density polyethylene (HDPE).

Applications

- >> The figure of 8 cables are suitable for installation in aerial environments for long haul communication

Fibre Optic Solutions

Non-Metallic Direct Burial Cable (12 -144 Fibres)

The Netprom 12 elements multi loose tube cable construction consists of up to 144, 250µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a fibre reinforced plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helically applied non metallic strength members with ripcord, corrugated steel tape (CST) armouring and black high density polyethylene (HDPE) jacket.

Features

- >> Multi-layered stranded construction (up to 144 fibres)
- >> Non-metallic construction
- >> Particularly light, thin and robust cable
- >> PE - jacket
- >> Fibre relevant standards - ITU-T G. 652, G. 655, G. 656 or combination
- >> Cable relevant standards - IEC 60793 and IEC 60794
- >> Wrapping is made of water blocking tape
- >> Dielectric central strength member

Applications

- >> Suitable for external duct applications
- >> Suitable for concrete channels
- >> Can be pulled into duct system

Fibre Optic Solutions

Double Jacket Direct Burial Cable (12 -144 Fibres)

The Netprom 12 elements multi loose tube cable construction consists of up to 144, 250µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a fibre reinforced plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helically applied non metallic strength members with ripcord, corrugated steel tape (CST) armouring and black high density polyethylene (HDPE) jacket.

Features

- >> Single layer stranded construction (up to 144 fibres)
- >> Corrugated steel tape as protection against rodents and mechanical damage
- >> Particularly robust cable, filled loose tube
- >> Inner and outer jacket are made of PE- Jacket
- >> Wrapped in water blocking tape
- >> Core- stranded loose tube, SZ technique
- >> Tensile strength elements - dielectric central strength member
- >> Fibre relevant standards ITU-T G.652, G. 655, G. 656 or a combination
- >> Cable relevant standards IEC 60793 and IEC 60794

Applications

- >> Direct burial
- >> Used in application with particularly high mechanical loads

Fibre Optic Solutions

2U Fixed Patch Panels

This innovative and robust 2U fixed patch panel has been designed to accept up to 96 fibres. The ability to use a full array of adaptor types offers a flexible solution to the end user; enabling them to incorporate a multifunctional panel, which allows easy access during installation or re-work, with no disturbance to the existing cable or fibres. In addition to an array of adaptors the panel also offers multiple cable entry solutions, up to 8 standard entry points for loose tube, tight buffered, pre-terminated and steel tape armoured cable.

- >> Up to 96 fibres in 2U
- >> Multiple adaptor options available
- >> 48 adaptor positions
- >> Individually labelled ports
- >> Reach / SVHC
- >> Fits standard 19"

Technical Specifications

2U Fixed Patch Panel	
Height	2U (88.8mm)
Width	480mm
Depth	300mm
Net weight	3.7 kg
Packaged weight	3.9 kg
Packaged dimensions	530mm W X 110mm H x 330mm D
IP rating	IP20
Suitable for Adaptor type	ST, FC, SC, SC duplex, LC duplex, E2000
Cable Entry 20mm	4
Cable entry 25mm	4
Mounting Adjustment range	80mm
Material	Cold-rolled steel
Material thickness	1.2mm
Material coating	Powder coating
Colour	RAL 9004
Operating temperature	-40°C to +60°C
Designed in accordance with	TIA/EIA 568.C, ISO/IEC 11801, EN50173, IEC60304, IEC61754, EN297-1
Compliant to	Reach / SVHC

Fibre Optic Solutions

1U Sliding Patch Panels

Our sliding patch panel system, in its basic form, is supplied with unloaded panels, ready for you to install your adaptor of choice. The panel can also be pre-loaded complete with your choice of adaptor and a simple splice management kit, or preloaded with pigtails. The tray is locked in place by two, simple to operate, plastic latches. When fully extended the tray is designed to lower to 45°, or by moving the tray to the side, it will lock to a shallower 10°. This provides the perfect working platform for simple installation and provides easy maintenance and access even after the panel has been installed in the rack.

- >> Recessed panel option
- >> Recessed adaptors provide improved fibre management
- >> No exposed screws
- >> Screen printed for easy labelling
- >> 45° working angle
- >> Rear cable entry options
- >> Panel numbers and rack number identification labels
- >> High quality finish, no sharp edges

1U Sliding Patch Panel Chassis With Removable Front Panels

1U Empty chassis panel for optional removable front panels - Black

This removable front-panel chassis is a 19 inch, 1U, sliding panel in two parts; a sliding chassis and a separate front panel, that receives the optical adaptors. Its primary advantage is the flexibility its modular composition gives, allowing you to maintain a separate stock of chassis and a variety of panels, only attaching a suitable front panel when needed.

- >> Recessed panel option
- >> No exposed screws
- >> Screen printed for easy labelling
- >> Rear cable entry options
- >> Panel numbers and rack number identification labels
- >> High quality finish, no sharp edges

Fibre Optic Solutions

Pre-Loaded Fibre Patch Panels

- >> Pre-loaded with 1.5m pigtailed as standard
- >> Colour coded
- >> The speedway splice tray allows storage of fibre with no need for stripping
- >> 30mm minimum bend radius maintained throughout
- >> Time saved on splice tray installation
- >> Pre cleaned
- >> Individual test certificates for each pigtail
- >> For use with heat shrink style splice protectors

100% Factory Visually Inspected Connectors

We visually inspect 100% of our connectors when we load a panel. The inspection and loading are carried out in a clean factory environment ensuring your loaded panel arrives in the best possible condition.

For use with heat shrink style splice protectors

Fibre Optic Solutions

2U Sliding Patch Panel

This innovative and robust 2U sliding patch panel has been designed to accept up to 96 fibres. The solution incorporates a multifunctional panel which allows for easy access during installation or rework with no disturbance of the existing cable or fibres. The panel offers multiple cable entry solutions including up to 8 standard cable entry points for loose tube, tight buffer, pre-terminated and steel tape armoured cable. Each panel has integrated strength member tie positions and the removable plate at the rear of the panel allows for the installation of steel tape armoured cable.

- >> Up to 96 fibres in 2U
- >> Up to 96 Adaptor positions
- >> Individually labelled ports
- >> 45° open working angle
- >> Accepts loose tube, distribution and pre-terminated cables
- >> Materials Compliant to RoHS2 and REACH/SvHC
- >> Fits standard 19"

Fibre Optic Solutions

Ultra High Density

1U Modular Patch Panel

120
fibers

Description

Netprom inc offers an innovative, high density patch panel. Designed to accommodate up to 120 connections within a 1U panel. These are split between 5 individual modules with up to 24 fibers within each. Each module accepts incoming fiber from either MTP® trunk cables or via pre-terminated assemblies. Pre-terminated cables are available as either ruggedized breakout cable or distribution cable.

Another alternative for cable entry is the patented Netprom FirstLight Prime breakout, capable of being pulled over long distances and connecting directly to equipment. Incoming cable can also be supplied un-terminated for splicing within a standard patch panel. Modules can enter the panel from the front or the rear. Each is supplied with a separate labelling card for ease of channel identification.

Cable entry is managed via a retrofit management bar allowing entry from either the left or the right hand side. Exiting patch cords are managed by a retrofit bracket allowing cables to be routed in any direction. Also available is a 3U system incorporating all of the above but with the addition of a removable door allowing complete access to all relevant components.

Second to this Netprom inc is pleased to offer a 0U solution designed to accommodate sufficient MTP® connectivity to support an individual blade per module. This is managed via a 96 fiber trunk cable directly terminated to 8 MTP® connectors within the module and the choice of MTP® or discrete connectors at the opposing end.

Features

- >> Modular Connection System
- >> High Density- scaling up to 120 discreet connectors and up to 720 fibers within MTP® interface
- >> Up to 24 discrete or 120 (MTP®) fibers connections a single module
- >> Cable entry via either MTP® connection or pre-terminated assemblies
- >> Pre-loaded in the factory to guarantee performance
- >> Can be supplied with pre-terminated pigtails for splicing on the opposite end
- >> Can be supplied with a module at one end and ruggedized tails for direct connection to equipment at the opposing end
- >> Can be supplied with a module at one end and 900µm tails for connection within a standard patch panel at the opposing end
- >> 5 individual modules per panel
- >> Module entry from front or rear
- >> Rear cable management
- >> Retrofit patchcord exit management
- >> Separate labelling cards
- >> ROHS, REACH SvHC and UL rated
- >> Fits standard 19" or ETSI rack

Applications

- >> Data centers, premise installations, telecommunication networks
- >> Ethernet, Fiber Channel, ATM, LAN, MAN and WAN
- >> Data communication networks
- >> Indoor applications

fibers

Ultra High Density
1U Modular Patch Panel

Description

Netprom inc offers an innovative, robust, high density 3U Chassis. This panel has been designed to accept up to 14 LGX style assemblies. With the ability to use a full array of adapter types offering a flexible solution to the end user, enabling them to incorporate a multi functional chassis which allow easy access during installation or re-work with no disturbance of the existing cable or fibers. In addition to the array of adaptors, the chassis also offers multiple cable entry solutions, MTP® trunk cables connected to 14 individual MTP® cassettes with up to 24 fibers in each, loose tube cable connecting to 14 Individual extended cassettes to allow standard splicing or 14 LGX style modules for pre terminated solutions, making this chassis one of the most flexible on the market.

Applications

- >> Data centers, premise installations, telecommunication networks
- >> Ethernet, Fiber Channel, ATM, LAN, MAN and WAN
- >> Data communication and telecommunication networks
- >> Indoor applications

Features

- >> Up to 14 LGX style assemblies
- >> Up to 14 x 24 fiber MTP® cassettes
- >> Multiple adapter options available
- >> Fully integrated fiber management
- >> Splicing option available
- >> Flat pack for easy shipment
- >> Patch cord exit retrofit cable management available
- >> 30mm bend radius maintained throughout
- >> Individually labelled ports
- >> Accepts loose tube, distribution cable and MTP® trunk cable
- >> ROHS, REACH SvHC and UL rated
- >> Fits standard 19"
- >> Rear cable management bar as standard

Also suitable for use with 1U Chassis

Wall Boxes

The Optronics wall box system in its basic form is supplied with the box unloaded ready for you to install the adapter of your choice. The box can also be pre-loaded complete with the required adapter, or pre-loaded with pigtails to meet your project needs. The quality of construction that comes with the FibreFab range of wall boxes ensures a safe, secure and aesthetically pleasing wall box for your network.
